

# ADI Daily Lesson Framework

A live lesson framework that supports planning, decision-making, adaptation and reflection throughout the lesson.

|                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                    |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Learner                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                    | Date |
| <b>TOPIC</b><br>(What are we practising?)                                                                                                                                                |                                                                                                                                                                                                                                                                                                    |      |
| <b>GOAL?</b><br>(What skill are we improving?)                                                                                                                                           |                                                                                                                                                                                                                                                                                                    |      |
| <b>RISK</b><br>(What might make the learner overwhelmed or make learning difficult?)<br><br>(What might we come across on our route?)<br><br>(How are we going to manage that together?) |                                                                                                                                                                                                                                                                                                    |      |
| <b>SUPPORT</b><br>(What support is most likely to help achieve today's goal?)                                                                                                            | <input type="checkbox"/> Full talk through <input type="checkbox"/> Prompt <input type="checkbox"/> Independent <input type="checkbox"/> Help manage workload<br><br><i>Full talk through should cover the whole routine, including the decision.</i>                                              |      |
| <b>WHAT HAPPENED?</b><br>(Evidence of learning linked to the goal)                                                                                                                       |                                                                                                                                                                                                                                                                                                    |      |
| <b>WHAT'S BLOCKING SUCCESS?</b>                                                                                                                                                          | <input type="checkbox"/> Knowledge and understanding <input type="checkbox"/> Skill <input type="checkbox"/> Thoughts and feelings <input type="checkbox"/> Workload<br>(Look for the cause, not the symptom)<br><br><i>If the lesson needs to change, review the framework before continuing.</i> |      |
| <b>REVIEW</b><br>(What went well?)                                                                                                                                                       |                                                                                                                                                                                                                                                                                                    |      |
| <b>WHAT NEEDS IMPROVING?</b><br>(What do we want to get better at?)                                                                                                                      |                                                                                                                                                                                                                                                                                                    |      |
| <b>FOCUS FOR NEXT LESSON</b><br>(What's the biggest need?)                                                                                                                               |                                                                                                                                                                                                                                                                                                    |      |

The lesson may adapt, but the goal remains the same unless a level change is required.

## Adaptation Filter

- Goal – Work on it
- Secondary Issue – Note & continue
- Obstacle – Fix & return
- Blocker / Level Change – Not performing at level required for current goal. New goal required.

# ADI Lesson Framework

## How to use this framework

| Section                 | Key question                                                                            |
|-------------------------|-----------------------------------------------------------------------------------------|
| Topic                   | What are we practising?                                                                 |
| Goal                    | What single skill are we improving?                                                     |
| Risk                    | What could interfere with safe, manageable practice, and how are we going to manage it? |
| Support                 | What support will most likely help achieve today's goal?                                |
| What Happened           | What evidence did we see?                                                               |
| What's blocking success | Why isn't the learner succeeding yet?                                                   |
| Review                  | What have we learnt and where next?                                                     |

## Adaptation Filter

### ● Goal - Adapt support in line with learner needs.

Example: Increase challenge if progressing well or increase support if struggling.

### ● Secondary Issue - Note and continue (consider increasing support).

Example: Missed mirror *check* on the way to the training area.

### ● Obstacle - Affecting the goal. Pause, fix and return.

Example: Repeated stalling at junctions prevents progress with the goal.

### ● Blocker / Level Change - Not performing at level required for current goal. New goal required.

Example: Planned dual carriageway lesson, but lane discipline and mirror use are below the standard required.

## How the framework supports the 17 competencies

| Framework                | How this framework supports the 17 competencies                                                    |
|--------------------------|----------------------------------------------------------------------------------------------------|
| Topic                    | Lesson planning, suitability of subject, practice area and level of challenge                      |
| Goal                     | Agreed objectives, learner involvement and client-centred learning                                 |
| Risk                     | Risk identification, risk management and a safe learning environment                               |
| Support                  | Teaching and learning strategies, coaching, instruction and adaptation                             |
| What Happened?           | Monitoring progress, ongoing assessment and evidence of learning                                   |
| What's blocking success? | Diagnostic assessment, adaptation of teaching and identifying the underlying cause of performance. |
| Review                   | Reflection, feedback, self-evaluation and next steps                                               |
